

Back to the Future?

GDP (Current US\$)

Re-energizing the East-West routes

- The East West trade routes need to be re-energized to take advantage of developments across the land borders.
- Pakistan's potential as energy and transport hub has to be realized
- This will lower costs, leading to manufacturing centers for employment and finally reaping the demographic dividend

Pakistan as the hub

- Connecting North–South with East-East economic corridors
- Education for productive workers but also tertiary education catering to the hub
- Vision
