Ethiopia has experienced sustained growth over the past 20 years. How has the labor market evolved?

Real GDP growth rate

Employment trends	Wages 0000	Female employment	Conclusion o	Appendix 0000

In this presentation, we focus on the urban labor market.

The analysis mostly uses data on employment rates and real wages from 2006 to 2018.

Key definitions here: Employment rate Unemployment rate Labor force participation

< □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □

000Conclusion
0000Appendix
0000

Ethiopia's experienced large urban employment gains, which have been largely lost since 2016

- The urban employment rate has grown from 56 to 62 percent between 2009 and 2015 (despite fast labor force expansion).
- 2 Two thirds of this gain was lost in 2 years (2016-2018);
 - Economic growth slowed down during this period.
 - But job creation declined by more than economic growth.
- 3 No gains in female or youth employment since 2006.

Employment trends	Wages 0000	Female employment	Conclusion o	Appendix 0000

And modest gains in real wages

- Returns to education have also fallen sharply (in parallel with the increased supply of education).
- But some good news: the gender wage gap has narrowed considerably.

Employment trends	Wages 0000	Female employment	Conclusion o	Appendix 0000

Key conclusions and related policy questions

- → Ethiopia was able to expand its urban labor market spectacularly between 2006 and 2015. Were there additional constraints that could be lifted?
- → What drove the post-2015 slow down? What policies can we put in place to revive job creation?
- $\rightarrow\,$ There is large scope to boost the labor market attachment of women and youth. How can we do this?

Key open questions

 \rightarrow What are the policies can we put in place to revive job creation?

 \rightarrow How can we make sure women and youth secure better employment outcomes?

Employment trends	Wages	Female employment	Conclusion	Appendix
0000	0000	000		0000

Definition of unemployment rate Back

• The ILO defines unemployment rate as:

unemp rate_{*ILO*} = $\frac{\text{Unemployed and actively looking for work}}{\text{Labour force}}$

• Ethiopia's Central Statistical Agency (CSA) uses a definition in which the looking for work criterion is relaxed. Unemployed persons who are willing to work at the prevailing market conditions are included, even if they did not actively look for work in the reference week.

unemp rate_{CSA} = $\frac{\text{Unemployed and available for work}}{\text{Labour force}}$

• The labour force consists of people who were engaged in gainful employment in the reference week + persons who are currently unemployed.

Definition of labour force participation rate Back

• Labour force participation rate is defined as:

LFP rate_{CSA} = $\frac{\text{Active labour force in the working age population}}{\text{Total working age population}}$,

where "active labour force" is defined as the count of people who were employed in the reference week + those who are unemployed but willing to work (as per CSA's definition). All persons aged between 15-64 years are included in the working age population.

Definition of employment rate

Share of Employment rate is defined as:

Employed persons in the working age population Emp rate_{*HO*} = Total working age population

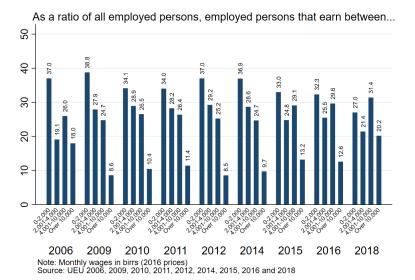

where "employed" corresponds to persons who were engaged in gainful employment in the reference week. All persons aged between 15-64 years are included in the working age population.

• Real wage is calculated by deflating reported nominal wage by the average cpi index for each year, as reported by Ethiopia's CSA. The base year for the cpi index is taken to be 2016.

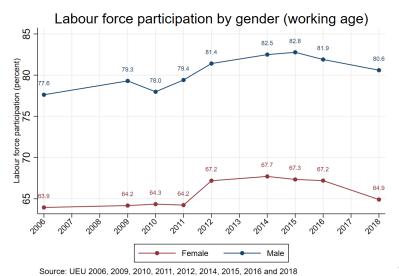

Real wage_t = $\frac{\text{Reported nominal wage_t}}{\text{CPI index}_t}$
